Direct delivery  
to logistics platform

## FULLY CUSTOMIZABLE

We can control and warehouse the security stock of your products, as well as manage the start of new products before you ever run out of current stock. These deliveries can be made by full truckloads to your warehouse/logistics centers or in smaller quantities directly to your storefront.

## INTERNATIONAL LOGISTICS NETWORK

With our logistics network, we can deliver your products anywhere in the world. We work with fully automated logistics warehouses in Europe, North America, and Asia. This allows us to deliver to you by full container, full truck, or carry out store deliveries.

## COMPLETE SERVICE

We consider ourselves more than suppliers or manufacturers. We want to be our clients' direct partners for all things global sourcing. We study your historical inventory needs, and we control each step of the process from each order received until the final delivery of goods.

# PLASTIC SOLUTIONS

Besides all of the packaging options we offer in our catalog, we also cover the industrial, agricultural, and food markets
